SUCCESS Story

Baldwin County PUBLIC SCHOOLS

Southwest Alabama

Public Schools : 47

High Schools: 6

Career Tech Centers: 2

**More than 24,000
Students**

Pace Learning Systems helps Baldwin County Schools achieve a 90% exit exam pass rate!

For the last two years, Baldwin County has met its Adequate Yearly Progress (AYP) goals and was recently awarded a NCLB grant of more than \$300,000. Surely the students and teachers of Baldwin County Public Schools are largely responsible for these achievements, but Nancy Danley, Secondary Curriculum Coordinator for the district, also gives credit to Pace Learning Systems.

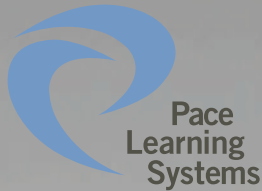

Baldwin County has seen a significant improvement in their pass rates, because PaceWare™ (Pace Learning Systems' software program) is highly correlated with the graduation exam.

In fact, Baldwin County Schools made PaceWare the only approved software for district-wide use due to its success in helping students with exit exam preparation and remediation.

I never hesitate to call Pace Learning Systems' 800 number because I know I will always get my questions answered, even if the person I call is not available.

Nancy Danley
Secondary Curriculum
Coordinator
Baldwin County Schools

However, the results of PaceWare in Baldwin County schools extend beyond passing graduation exams. According to Ms. Danley, there is significant improvement in performance in the subjects where PaceWare™ is implemented.

Ms. Danley cites three main reasons why she believes PaceWare is so effective with her students:

- Ease of use for both teachers and students
- Correlation to graduation exams
- Affordability to the district

Ms. Danley finds PaceWare's technology to be immediately approachable and self-explanatory. "Often teachers and students don't trust the computer, so when a program is too complicated, they won't use it," says Ms. Danley. "Teachers can manage and feel comfortable with PaceWare."

And, since PaceWare does not require advanced hardware, it is compatible with nearly all computers in the school system.

In addition to its usability, she appreciates the practicality of Pace Learning's print and software materials. Since the content of the print and software materials are not identical, they can be used in conjunction with each other for powerful reinforcement. The software can be installed in the computer lab, while the print materials can be used in a non-computer equipped classroom.

And, Ms. Danley appreciates working with Pace Learning Systems as a company, citing their lifetime technical support for PaceWare and their outstanding customer service.
